## Navigator Release Notes

**Release Date: February 10, 2020**

The following remedies and enhancements are included in the Selection Navigator release dated February 10, 2020. This document is provided as a summary resource to improve your user experience with the *Navigator*® customer portal and the applications contained within the platform.

If, after reviewing this document, you have questions about anything contained within this release, contact the *Navigator* support team at [navigatorsupport@hvacnavigator.com](mailto:navigatorsupport@hvacnavigator.com) or call 844-319-0726.

---

### Selection Navigator

#### What's New?

##### *BSNA*

- EBE Non-Working Supervisor no longer includes the crew size in calculation.
- Updated hover over text on the orders tab: "Go to Products in Delivery".
- Revised hours and updated task descriptions for COA tasks.
- Changed system copy to maintain product active status regardless of destination parent status.

##### *Controls*

- Estimate Details Systems Tab will now retain the user's displayed columns, column order and grid sorting.

##### *Ducted Systems – Applied Rooftops - Premier*

- Rapid Ship option now available for individual Premier units. When Rapid Ship is selected, options not eligible for rapid ship will be unavailable. Pricing Reports will prominently highlight that Rapid Ship has been selected for the unit.
- EER and IEER are now displayed on the performance output screen.
- Performance page now displays the certified AirXchange dynamic link library version number.
- Added following Spec Text language to all valid Premier units: "All coils shall be pressure-tested at a minimum of 650 psig."

##### *Ducted Systems – Applied Rooftops – S100/YPAL/OmniElite*

- Added Glycol Option for Hot water coils.
- EER and IEER are now displayed on the performance output screen.

## Navigator Release Notes

### *Ducted Systems - Unitary*

- Residential Packages have been added to the Selection Wizard.
- Vulcan and new 3-stage models for L526/524 have been added to the Selection Wizard.
- Orders detail page will now show values in currency as selected by the user in their user preferences.
- Orders may not be submitted with line items containing an expired IPA. Expired line item(s) must be removed from order before it can be submitted.
- When gas heat temp rise is more than value allowed, a pop-up warning is now displayed.

### *Fire Detection*

- New Simplex 4003EC Standalone Voice Panel Configurator is available.
- Users can cancel their own Special Pricing Requests in a Submitted or Approved state allowing editing of products. If a Special Pricing Request is cancelled the sales manager will be informed by email and a new request will need to be submitted.

### Fixes

#### *BSNA*

- Corrected issue where the System Audit Report and Change Order Request documents do not generate.
- Hours in the Electrical Budget Estimate are now consistently presented in the correct format.
- Material Adjustment Factor now properly affects the material cost for an Electrical Budget Estimate.

#### *Controls*

- EDI file associated with an AOMS order now properly contains all line items associated with the order.

#### *Ducted Systems – Applied Rooftops - Premier*

- Performance report will show valid values for the Steam Coil input and output data when default values are selected.

#### *Ducted Systems – Applied Rooftops – S100/YPAL/OmniElite*

- Corrected issue with invalid rating for electric heat unit.

#### *Ducted Systems - Unitary*

- Submittal document now properly displays logo.
- Corrected issue where incorrect brand is applied to a user's selection. This affected users that have access to multiple accounts where one of the accounts has only one valid brand for a given product.
